EXPERIMENT 12 - Simple Programming using REPEAT, WHILE

1)

```
mysql> DELIMITER //
```

```
mysql>
```

```
mysql> CREATE FUNCTION build_string()
-> RETURNS VARCHAR(100)
-> DETERMINISTIC
-> BEGIN
->     DECLARE x INT DEFAULT 1;
->     DECLARE result VARCHAR(100) DEFAULT '';
->
->     WHILE x <= 5 DO
->         SET result = CONCAT(result, x);
->         SET x = x + 1;
->     END WHILE;
->     RETURN result;
-> END //
```

```
Query OK, 0 rows affected (0.06 sec)
```

```
mysql>
```

```
mysql> DELIMITER ;
```

```
mysql> SELECT build_string();
```

build_string()
12345

```
1 row in set (0.03 sec)
```

2)

```
mysql> DELIMITER //
```

```
mysql>
```

```
mysql> CREATE FUNCTION increase_income()
-> RETURNS INT
-> DETERMINISTIC
-> BEGIN
->     DECLARE income INT DEFAULT 1000;
->
->     REPEAT
->         SET income = income + 500;
->     UNTIL income >= 4000
->     END REPEAT;
->     RETURN income;
-> END //
```

```
Query OK, 0 rows affected (0.01 sec)
```

```
mysql>
```

```
mysql> DELIMITER ;
```

```
mysql> SELECT increase_income();
```

increase_income()
4000

```
1 row in set (0.00 sec)
```

RESULT:

Thus, the Simple programming exercise using (REPEAT, WHILE)executed successfully.
